

## International Supercomputing Conference Offers One-Day "Tour" of the IT World – Just €130 (or less!)

**HAMBURG, Germany—In the fast-moving world of Information Technology, keeping up with the latest developments in high performance computing and networking can be as demanding as a month-long business trip with so many places, facts and figures that it's hard to remember what you have already seen and where you are going next.**

But what if you could get a global perspective on the latest hardware, software and services from the world's leading providers of high performance computing and networking equipment? And see it all in one or two days, in one stop, with the latest technology displayed side by side for comparison? And have the opportunity to ask the important questions and get straightforward answers from experts?

No problem. The 2009 International Supercomputing Conference (ISC'09), to be held June 23-26 in the Congress Center Hamburg, is Europe's number one high performance computing exposition, featuring nearly 120 of the world's leading high performance computing and networking companies and research institutions. Exhibits Plus Passes are available for each day of the exhibition. The cost is €70 for Tuesday, June 23, and €130 for either Wednesday, June 24, or Thursday, June 25.

While all Exhibits Plus Passes include catering and an evening social event, the Wednesday and Thursday passes also include admission to Exhibitor Forum and Hot Seat sessions on those days.

Full details on how to purchase Exhibits Plus Passes can be found at: [www.isc09.org/fees](http://www.isc09.org/fees). The current list of ISC'09 exhibitors can be found at: [www.isc09.org/exhibitors](http://www.isc09.org/exhibitors).

"We realize that the ISC conference program and the exhibition is a powerful combination for many people in the HPC community, but we also realize that there are many organizations who could greatly benefit from focusing on the exhibits," said Prof. Hans Meuer, general chair of ISC'09. "For this reason, we now offer a special Visitor Pass for visiting the exhibit and attending several conference sessions. The amount of information one can gather from the exhibits and sessions can be extremely valuable in today's competitive business environment and we believe the one-day pass to be a very rewarding investment."

In addition to the extensive exhibits, the conference includes four days of technical sessions, research poster and birds-of-a-feather sessions, and after-hours networking opportunities. The conference program is conducted in English.

# INTERNATIONAL SUPERCOMPUTING CONFERENCE

Europe's Premier HPC Event

ISC, which marks its 24th anniversary in 2009, has a well-established reputation for presenting well-founded, precise and up-to-date information in an environment that encourages informal conversations and sharing of ideas. To learn more about the conference program, please visit the ISC'09 website at <http://www.isc09.org/>. One day passes can be purchased from the conference registration page at <http://www.isc09.org/registration>.
