Online Registration Opens for International Supercomputing Conference

Flexible rates and registration structure await early online registrants

HAMBURG, Germany, February 1, 2010 – Online registration for the 25th International Supercomputing Conference – ISC'10 – is now open and offers early registrants both lower “early bird” rates and options for tailoring their attendance according to their interests and needs.

The early registration rates for the ISC'10 Conference and Exhibition are valid through April 30 and provide a minimum saving of 20 percent off the regular onsite registration fee. Additionally, registrants can save up to 30 percent if they register for the full duration of the event: May 30- June 3. Detailed information about fees and registrations is available at <http://www.supercomp.de/isc10/Registration/Registration-Fees>.

“In keeping with the tight global economy and in the spirit of the ISC'25th Anniversary, we are pleased to offer our reduced registration fee structure for the second year in a row,” said Martin Meuer, ISC's Executive Director. “I think those of you who have attended ISC in the past know that it's a valuable investment in staying at the forefront of HPC. If you haven't had a chance to experience ISC yet, 2010 is the perfect time to start.”

ISC'10 will once again be held at the Congress Center in Hamburg, Germany. It is truly a unique platform for making contacts and doing business: it presents many networking opportunities and allows attendees to meet HPC key players in a collegial atmosphere. All conference proceedings are conducted in English.

The 2010 technical program is most comprehensive, consisting of six half-day tutorials on Sunday, May 30, followed by a 4-day conference program including special sessions on high performance computational life sciences, exascale computing, space science (NASA), energy research and turbulence modeling. On each conference day, world-renowned speakers will present exciting keynotes on HPC and related industries. The complete tutorial and conference program is available at <http://www.supercomp.de/isc10/Program/Overview>.

The 3-day exhibition will feature dynamic exhibits from 140 of the world's leading HPC companies and research organizations on supercomputing, storage and networking technologies. An exhibition overview is available at <http://www.supercomp.de/isc10/Exhibits/Overview>.

About ISC'10

Now in its 25th year, ISC is the world's oldest and Europe's most important conference for the HPC community, offering a strong four-day technical program with a wide range of expert speakers and exhibits from leading research centers and vendors. A number of events complement the technical program, including Tutorials, Scientific Day, Birds of a Feather (BoF) Sessions, a Research Poster Session, Exhibitor Forum and the popular "Hot Seat Sessions" featuring leaders from industry and research centers. The conference has experienced tremendous growth over the last few years, with an estimated 2,000 participants from around the world expected to convene in Hamburg in 2010.

ISC'10 is open to IT-decision makers, members of the HPC global community and other interested parties. The ISC exhibition allows analysts, decision-makers from the automotive, defense, aeronautical, gas & oil, banking and other industries; solution providers, data storage suppliers, distributors, hardware and software manufacturers, the media, scientists and universities to see and learn firsthand about new products, applications and technological advances in the supercomputing industry today. For registration, conference and exhibition information, please visit <http://www.isc10.org/>.
